"An excellent visit to Paradise Park. The variety of exotic birds is amazing. It makes you realise just how wonderful nature is to create such beautifully coloured birds. The flying display is definitely the highlight of the day, especially when the flock of macaws was released from their enclosure. Penguin feeding time was another highlight despite the fact that most of them were uninterested in food and just wanted to swim in the cool water on what was a really hot day. The choughs were lovely to see and to watch as part of the display."

"Beyond expectations!

We had a fabulous day out. Fun for everyone young and older – they have an endless selection of birds of different species and colours, great for taking pictures. The highlights were the very informative and entertaining bird shows – the birds flew very close to us! They've also got a wider selection of other animals which you can feed which the kids really enjoyed. We saw lots of young kids and teens and they were having a great time (along with our teens). We had food and beverages around lunch time with lots of seating outside and inside. The staff were lovely, I'd happily visit again!"

"We thoroughly enjoyed our day at Paradise Park. The whole place was really well staffed and very well maintained and clean. The investment in great staff really showed. There was an outstanding range of birds to view including in a free flying aviary, as well as a little farm, an indoor play area in the jungle barn (you need to prebook a time slot and this too was so clean and tidy!) and red panda and otters etc. Lots of informative shows with plentiful outdoor seating throughout the day. The nectar feeding of rainbow lorikeets was a real highlight for the children. It was the perfect size and a real credit to whoever is managing it. I appreciate zoos and wildlife parks are not for everyone but this seemed to be run really well and responsibly with all enclosures and areas for birds and animals very well maintained."

"This place has a real special place in my heart.

The hard work the staff do and the pure love they have for the birds is evident to see. The birds of prey show and the free flying show – just wow. Feel really lucky to witness these magnificent birds doing their thing. Just awesome."

From Emma – Google review Summer 2023

A great day out with a great selection of displays and talks. So lovely to see so many of the birds flying free and or in large aviaries. The staff were passionate about putting conservation across to the public too and raising money for causes including chough reintroduction, saving vultures and the parrot trust.
